

FAXport & Xerox DOCUMENT CENTER

Xerox Document Center users now can benefit from direct faxing with FAXport.

Faxport Inc. A provider of universal communications and mobile business solutions announces the availability of new FAXport integrations for Xerox Document Center systems. The new integration enables users to access documents and send outbound faxes directly from a Document Center.

The new FAXport integrations mean enterprises with Document Centers can deploy an enterprise-wide network fax solution that takes advantage of the efficiencies of the combined technologies.

When integrated with one or more Document Centers, the FAXport server takes over the fax transmission and reception functions, and bottlenecks are reduced. The networked system eliminates the need for stand-alone fax machines and dedicated phone lines or modems for individual workstations.

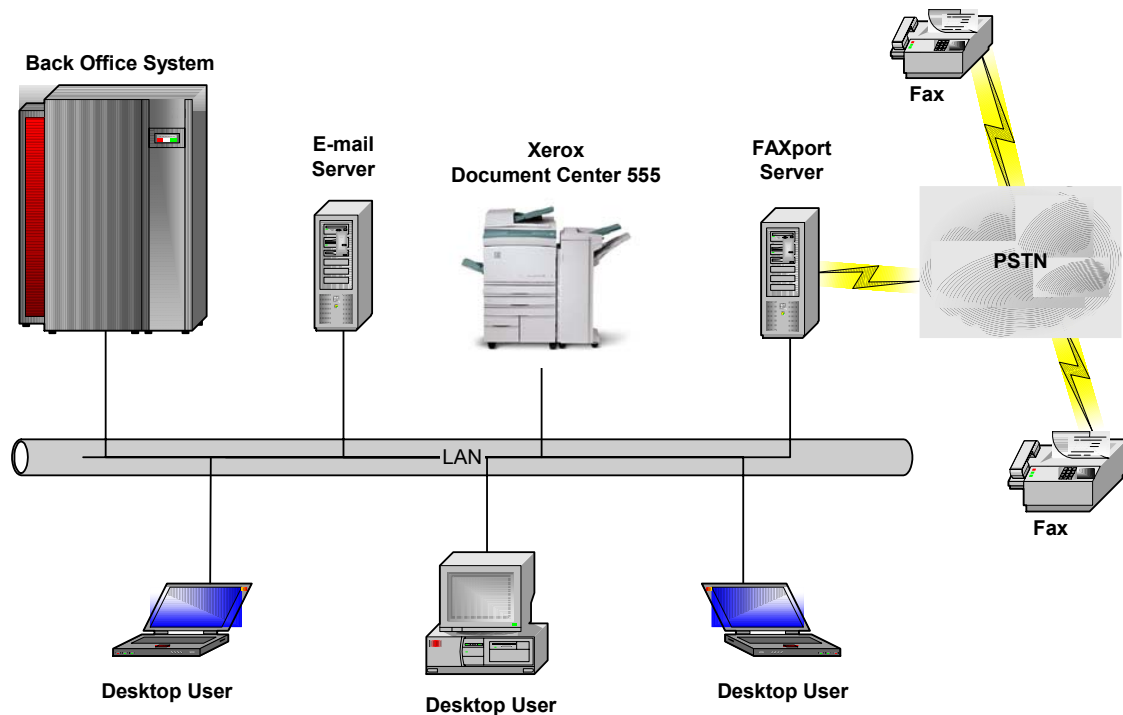

Features and Benefits

FAXport IP Fax Messaging software allows users from their desktop and anywhere on the network—to prepare, preview, send, and receive faxes. Through integrating FAXport with e-mail and the most common applications, FAXport becomes a part of everyday activities. FAXport is a feature-rich technology that provides economical network faxing capabilities and improved productivity, eliminating the need for dedicated fax machines and phone lines. By integrating FAXport with the document center users can:

- ◆ By utilizing the fast printing & scanning of the document center with the convenience & power of a FAXport server, faxing simply becomes an extension of the customers e-mail system; convenient, powerful & reliable.
- ◆ Send faxes directly from standard e-mail Clients. By adding a "Fax To" button, sending a fax from Microsoft Outlook or Microsoft Exchange client is as easy as sending e-mail.
- ◆ Receive faxes directly into their e-mail Inbox, immediately & confidentially
- ◆ Send/receive multiple faxes simultaneously across multiple lines (analogue/ISDN2/ISDN30)
- ◆ Send any electronic documents directly to any fax number without leaving their desk & without producing one piece of paper
- ◆ When FAXport is powered by TRANSport it provides automatic electronic delivery of mission-critical documents from back office application and legacy platforms. Documents such as invoices, financial statements, purchase orders etc.
- ◆ Access fax numbers from any central and/or personal fax address list
- ◆ Notify the user when the fax has been sent, when a new fax has arrived or if there is a problem with a fax.
- ◆ Electronically archive & audit every fax ever sent or received by the organization
- ◆ FAXport offers comprehensive printing solutions from wireless devices to any fax machine, when powered by SMSport.
- ◆ FAXport can utilize any type of modem from simple "Class I & II modems to all kinds of intelligent modems.

FAXport & Document Center Typical Configuration
